The following documents identified in the International Search Report have been considered for the purposes of this report:

|-------|----------------|------|------------|
| (i) | WO 2002/062693 | (iv) | US 6050291 |
| (ii) | US Des. 435405 | (v) | US 5988207 |

Novelty (N) and Inventive Step (IS) Claims 1-21

Claims 1-21: The invention of the amended claims is directed to a hose storage device having an upper portion and a lower portion; the lower portion having a side wall including a port through which a hose may extend; a retractable hose reel housed within the lower portion; and one of the adjacent edges of the upper and lower portions being spaced outwardly from the other adjacent edge.

No individual citation, nor obvious combination of citations, discloses a hose storage device having all of these features.

The closest art of citation (iii) discloses a hose container having an upper portion in the form of a statue and a lower portion housing a retractable hose reel. However, the lower portion does not include a port in its side wall through which a hose may extend, nor do the upper and lower portions have adjacent edges. Rather, the upper portion is received within the centre of the hose reel housed inside the lower portion.
